## *Specimen Plants*

There are many fine large specimen Camellia plants in our stock ranging from four to eight feet in height. As listing this stock would involve much more space than this list permits, we invite your inquiries. Many years can be gained by purchasing these large plants and you will have the immediate benefit of their beauty.

## *Collectors*

For years this nursery has catered to those who are making a hobby of collecting fine Camellias. We continue to increase our collection of rare varieties so that we may offer an ever greater number to the collectors. By long experience we have weeded out the undesirable varieties and offer the finer ones. You may be assured of an honest opinion on the relative merits of varieties we offer.

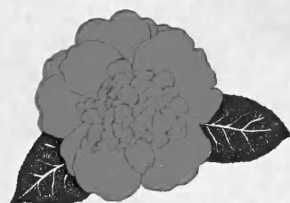

As Camellias have frequently been misnamed and several synonymous names may be given to a variety, collectors complain of duplications. Every effort is made to avoid sending duplicates. Great care is exercised to appraise our customers of duplications in their orders.

We further urge you to send us your Camellia problems. We will gladly help where possible, regardless of whether these problems are cultural or such as choosing a suitable color range. It is also possible for us to help you to choose varieties that will give a blooming season of six or seven months. Few flowers will provide bloom for so long a period.

We are always glad to help you with your Camellia problems and invite your correspondence.

*Lindo Nursery* CHICO, CALIFORNIA

## *Lindo Camellias*

No flowering shrub presents more varied or more pleasing possibilities for home beautification, landscaping or personal adornment than Lindo Camellias. They include an almost endless variety of solid colorings and variegations. They are easily started and easily grown and can be readily adapted to almost any soil conditions.

From a very modest beginning some thirty years ago we have, by study, experiment and culture developed an amazing variety of these beautiful flowering shrubs. Our collection exceeds four hundred different types and is acknowledged to be the finest in the West. Every plant is healthy and vigorous and is carefully prepared for shipment and planting. This work is done by experts who have made almost a life study of every phase of Camellia propagation, development and growth.

All shades of red and pink and white and all combinations of these colors are represented in our nursery. It is difficult for anyone who has not visited our gardens to realize the beauty and decorative possibilities of these plants.

In the following pages is a price list for the many varieties and sizes of Lindo Camellias. Descriptions are also included together with instructions for successful Camellia growing.

## BRIEF DESCRIPTIONS OF LINDO CAMELLIAS

These plants are practically always available in the sizes listed and in almost any desired quantity.

Amabills—Single white, nearly half of flower covered with yellow stamens, medium size.

Angelo Cochet—Symmetrically formed, very double, predominantly white with deep pink blotches radiating from center, medium large.

Anna Frost—Similar to Compte de Gomer.

Anne Lindberg—Peonia type showing stamens, deep red, medium large.

Apple Blossom—Single, apple blossom pink, small.

Aspacia—Peonia type, stamens intermingled, occasional white spot, large.

Auguste Del Fosse—Large full double, carmine red, large.

Austell Pink—Peonia type showing stamens, red, large.

Belgian Red—Full double symmetrical form, clear medium red, medium large.

Belle Jeanette—Full double symmetrical, deep pink, white blotches, large.

Belle Romana—Loosely formed showing stamens, extremely variegated, general color deep pink, very large.

Bolens Late Tricolor—Semi double, pure white with red stripes or spots, large, blooms late.

Brooks Variegated—Full double symmetrical, variegated with deep pink, large.

Campbell—Loosely formed flower fairly symmetrical, shows stamens, deep pink, large flower, dense grower.

Candida Elegantissima—Semi double irregular form, deep pink blotched white, extremely large.

Chandleri Elegans—Semi double, pompon center, deep pink blotched white, extremely large.

Chancellor—Peonia type, medium to deep pink flecked with white, large.

Cheerful—Full double symmetrical shows stamens when fully open, medium red, medium large.

Cleviana—Loose pompon type showing stamens, medium red, medium large.

Col. Firey—Extremely double, very symmetrical, brilliant red, large.

Compte de Gomer—Full double symmetrical form, delicate pink background flecked with numerous minute rose specks, general coloring delicate pink, medium large.

Countess of Orkney—Full double symmetrical, delicate pink striped with red, medium large.

Daikagura—Loosely formed peonia type, very deep pink, very large.

Daikagura Var.—Same as Daikagura except for having clear white blotches.

Dante—Full double, very symmetrical, high center, pure white, medium large.

Deep Pink Napa—Full double, symmetrical, deep pink, medium large.

Donkilar—Semi double, fairly symmetrical, shows stamens, deep red with large clear white blotches, sometimes solid red, large.

Dorsli—Semi double, rose pink, large.

Duc de Bretagne—Semi double, shows stamens, deep pink, small.

Duc de Orleans—Twisted outer petals, pompon center, light pink, heavily spotted and streaked with deep pink, large.

Elizabeth—Description unknown as yet.

Elena Nobile—Very full, double, very symmetrical, deep clear red, large.

Emperor—Semi double, deep pink, extremely large.

Eugene Lizzie—Similar to Vallevareda.

Finest Daikagura—Same as Daikagura Var. but predominantly white.

French Peonia—Full double symmetrical, deep pink, medium large.

Glorie de Nantes—Semi double loosely formed shows stamens, deep pink, very large.

Grandiflora Rosea—Semi double, outer petals turn back, prominent stamens, deep rose, extremely large.

Guilfolius Halena—Full double, very symmetrical, medium pink streaked with fine deep pink stripes, large.

Hikari Gengi—Loosely formed flower fairly symmetrical, sometimes shows stamens other times has pompon center, blended with three distinct shades of pink, large.

Imperator—Pompon type shows some stamens, deep red, large.

Jarvis Red—Pompon center, brilliant red, medium large.

Jennie Lind—Symmetrically formed, full double, pure white with one or two tiny pink lines in each flower, medium large.

John G. Drayton—Loosely formed flower showing stamens, pure white, large.

John Laing—Full double, symmetrical, medium pink, medium large.

Ladiner's Red—Flat flower full double, very symmetrical, brilliant orange red, large.

Lady Sumerez—Description Unknown.

Large Walker—Loosely formed flower, medium red, very large.

Lavinii Niggi—Peonia type, white with some pink stripes, medium large.

Lke Comte De Gomer—Similar to Comte De Gomer, but blooms later.

Madam Faucilon—Symmetrically formed, light rose pink, medium large.

Madam Labois—Full double symmetrical, deep red, medium large.

Mallott Var.—Loosely formed flower fairly symmetrical, deep rose pink with clear white blotches, large.

Marguerete Gouillon—Semi double, pompon center, light pink heavily streaked with deep pink, medium large.

Marie Moren—Double irregular formation, rose pink, medium large.

Mathotiana Alba—Pure white usually has one tiny pink spot on a flower, extremely full double, very symmetrical, very large.

Matsukasa—Shape like a pine cone, high centered regular formation, rose pink blotched with white, medium large.

Mrs. Abby P. Wilder—Peonia type, rose pink, medium large.

Nobelissima—Peonia type, pure white, medium large.

Nonpareil—Description unknown.

Opelon's Peony—Description Unknown.

Peoniaflora—Peony type, large pompon center white blotched with deep pink, extremely large.

Pink Hikari Gengi—Same as Hikari except solid pink.

Pink Perfection—Full double very symmetrical, shell pink, medium large.

Pink Star—Semi double about two rows of petals open out flat, light pink color shows veining, very large.

Pope Pius IX—Full double very symmetrical, brilliant orange red color, large.

Pride of Rosebud Farm—Semi double shows stamens, petals crinkly, deep rose pink with white blotches, large.

Princess Bachanachi—Irregular formation, red, medium large.

Prof. C. S. Sargent—Has one row of outer petals surrounding tight pompon, deep red, medium large.

Purity—Very symmetrical full double formation, pure white, medium large.

Queen of Hearts—Semi double, white background, large deep blotches radiate from center, medium large.

Rainy Sun—Brilliant light red, semi double, very large.

Red Clarke—Full double symmetrical, light red, medium large.

Red Eagle—Semi double cup shaped flower showing stamens, red, very large.

Red Walker—Irregular formation, medium red, medium large.

Reine des Fleurs—Full double symmetrical, deep pink with small white flecks, medium large.

Rev. John Bennett—Semi double showing stamens, salmon pink, medium large.

Rosita—Full double symmetrical, medium large, rose pink.

Rouge—Full double symmetrical, red, medium large.

Rubra Virginalis—Description unknown.

Sarah C. Hasti—Pompon type, delicate pink, medium large.

Sarah Frost—Full double symmetrical, red, medium large.

Semi Double Blush—Semi double showing stamens, has the faintest trace of delicate pink, medium small.

Snow Maiden—Double slightly irregular, pure white, medium small.

Somegawa—Full double symmetrical, delicate pink background heavily striped with deep pink radiating from center, medium large.

St. Andre—Double, tiny pompon center, dark red, medium small.

Stilson Vallevareda—Very full double, very symmetrical, delicate pink center shades deeper pink outside white blotches throughout, large.

The Dove—Semi double showing stamens, pure white, small.

Tricolor—Semi double showing stamens, three shades of pink radiate from center, general color deep pink, medium large.

Triumphus—Description unknown.

Uncle Sam—Full double, medium red, large.

Vallevareda—Full double very symmetrical, delicate pink center deep pink outer petals, large.

Variegated Bidwell—Peonia type showing stamens predominantly, white deep pink blotches, large.

Wakanoura Variegated—Semi double cup shaped, delicate pink with large deep pink blotches radiating from center, large.

Warrata—One outer row of petals frames a compact pompon, very dark red, medium large.

Wm. S. Hasti—Double symmetrical shows stamens when fully open, deep red, extremely large.

No. 8—Peonia type, shows stamens, bright red, medium large.

No. 10—Peonia type, light pink background flecked with deep pink, medium large.

No. 11—Peonia type, medium pink flecked with deep pink, medium large.

## INFORMATION

**Transportation:** Prices in this list are f. o. b. Chico, Calif. All transportation charges are to be paid by purchaser. We exercise great care to ship by the cheapest and best routes and to secure the lowest rates on all shipments.

**Quality:** Lindo Camellias are strong and vigorous. They carry a reserve strength that makes them grow easily and quickly in your garden. This, coupled with the fact that our soil fuses readily with other soils, makes it easy to establish our plants. They start to grow in your garden immediately and will continue in a vigorous condition.

**Camellias Are Easy to Grow** and very hardy. Observe a few simple rules and you will be generously rewarded.

## QUESTIONS AND ANSWERS

The following is offered to answer in advance some of the questions most frequently asked about camellias.

**Bud Dropping:** This is frequently due to great fluctuations in temperature; some times to drouth conditions. Camellias like constant moisture comparable to that required by your lawn. Keep your camellias healthy and there will be little bud dropping.

**Mottled Leaves:** This is usually due to improper soil conditions—probably alkaline. Regular applications of Camellia-Azalea fertilizer should properly acidify your soil and prevent mottled leaves.

**Fertilizer:** Camellias require an acid soil which can readily be obtained by use of Camellia-Azalea fertilizers obtainable at nurseries or feed stores. The amount used will depend upon your own soil, alkaline soil needing more than neutral or acid soil. Apply according to directions and repeat until your plants have dark green glossy leaves. Apply fertilizer from February until the last of July. Use sparingly and frequently and watch the results. Three times the normal growth can be obtained with proper fertilizing.

**Exposure:** An eastern exposure sheltered from the hot afternoon sun is most ideal. However, camellias will grow in full sunlight even in hot climates. Care should be taken, however, to prevent sunburn during the first season where fully exposed. Ample water and possibly a shade will accomplish this purpose.

**Drainage:** Camellias like constant moisture but must have good drainage. If your soil is heavy or poorly drained, dig a hole two or three feet deep and fill the bottom with gravel, then place earth over this and plant in the regular way.

**Picking Flowers:** Yes! You should pick the flowers. Use them in your house. Wear them. Enjoy camellias to the utmost, but use discretion in the picking. Don't take more than three or four inches of stem and remember that replacement of camellia wood is not so rapid as that of roses.

## DON'TS

1. Don't remove the burlap from the ball.
2. Don't jolt the plant so that the ball will be broken.
3. Don't place the plant deeper than it stood when planted in the nursery.
5. Don't plant in an alkaline soil without proper preparation.
6. Don't fail to water regularly.
7. Don't fail to cut the blossoms and enjoy your camellias. (See paragraph on cutting).
